

A diagram of a rectangular structure, possibly a container or a frame, with a horizontal line dividing it into two equal halves. On the left side, there are two vertical arrows pointing towards each other, each labeled "14, 0°". The top and bottom edges are labeled "STR".

Technical drawing of a building facade showing a cross-section with numbered callouts 1 through 6. The drawing includes elevation markers: FM +30,750 on the left, FM +30,600 on the right, and BEF. FM +30,410 at the base. The facade features a green upper section and a red lower section with two dark rectangular windows.

Technical drawing of a building facade. The building is red with a grey roof and a central door. Numbered callouts 1-7 point to specific features: 1 points to the base of the door, 2 points to the door handle, 3 points to the roofline, 4 points to the roof ridge, 5 points to the roof slope, 6 points to the roof edge, and 7 points to the base of the building. Elevation markers are shown: 'BEF. FM +30,860' on the left, 'FM +30,600' on the left side, 'FM +30,780' on the right side, and 'FM +30,780' on the right edge.

Technical drawing of a rectangular structure, likely a window or door frame, showing dimensions and load labels. The structure is defined by a top horizontal line, a bottom horizontal line, and two vertical lines on the sides. The top horizontal line is labeled with a dimension of 2000 in the center. The bottom horizontal line is labeled with a dimension of 2000 in the center. The left vertical line is labeled with a dimension of $FM + 30,780$ at the bottom. The right vertical line is labeled with a dimension of $FM + 30,780$ at the bottom. A central vertical line is labeled with a dimension of $+ 30,800$ at the bottom. The structure is divided into three vertical sections by the central vertical line. The top section is labeled with a dimension of 1000 on the left and 1000 on the right. The middle section is labeled with a dimension of 1000 on the left and 1000 on the right. The bottom section is labeled with a dimension of 1000 on the left and 1000 on the right. The structure is shown in a perspective view, with the top and bottom lines slightly angled.

Technical drawing of a building facade showing elevation and section views. The drawing includes numbered callouts 1 through 6. The elevation view shows a red brick wall with two windows and a green roof. The section view shows the internal structure of the wall and roof. The drawing is labeled with elevations: FM +30,780 and BEF. FM +30,860 on the left, and FM +30,780 and BEF. FM +30,410 on the right. A dashed line indicates a level difference between the two sections.

A diagram of a house with a gabled roof. Numbered points are: 1 (bottom center), 2 (bottom left corner), 3 (left roof slope), 4 (peak), 5 (right roof slope), 6 (top right corner), and 7 (bottom right corner). Elevation markers are: 'FM +30,780' at the bottom left, 'FM +30,750' at the bottom right, and 'B.F. FM +30,410' at the bottom center with an upward arrow.
